PERFORMANCE - VERSATILITY - ERGONOMICS

The new update allows you to accept and use the X35 coils and all their features without the need to buy a completely new detector! Also the version 5 update includes some new features to the W54 and W55 wireless headphones, now they have become even more versatile!

FREE UPDATE AVAILABLE ON OUR WEBSITE :

www.xpmetaldetectors.comDETECTORS > DEUS > DEUS UPDATE

The new version 5 headphone menu:

These new version 5 settings are active even if you do not have a new X35 coil. A great option for DEUS owners who just use the headphones!

Designed around brand new electronic advances, these new high performance and versatile coils will allow you to choose from a wide range of frequencies ranging from 3.7kHz to 27.7kHz. In total there are 35 available frequencies, based around 5 main frequencies that are quickly accessible.

A new Boost mode is now an option on frequencies 3.7Khz to 4.4 kHz and can significantly increase detection depth on highly conductive targets, such as large masses and large Silver coins. For added performance on such targets we recommend the larger coils such as the 34/28 cm (13" x11") or the 28cm (11") round coil.

These new coils will be supplied as standard with the DEUS and have a 5 year warranty.

3.7 to 4.4kHz, 7.1 to 8.4kHz, 10.5 to 12.4kHz, 15.2 to 17.8kHz, 23.5 to 27.7kHz

 Normal or Boost option – The transmitted power has 2 selectable levels when using frequencies 3.7Khz to 4.4kHz. the battery life of the coil may be reduced down to 6 hours in BOOST mode.

• High frequencies 23- 27.7kHz — Excellent sensitivity to low conductive and small targets.

• Better overall stability

• The overall battery life of the x35 coil has improved on most frequencies by +10% to +40%

• The X35 cails 22cm (9"), 28cm (11") and 34 / 28cm (13" x11") will work with the DEUS in version 5.
